FOREWORD

This listing of Canadian Botanists supersedes the directory compiled by Moore in 1959. It is hoped that it will serve to promote communication between botanists and thus play a role in encouraging the development of a national botanical association. Only through such an association can botanical endeavor in Canada be properly coordinated and botanists themselves shoulder their full professional responsibility.

The boundaries of botany are difficult to separate from those of the crop sciences even when interpreted broadly. This list undoubtedly contains inconsistencies of treatment in the fringe area. The compilation includes the Canadian members of the Canadian Society of Plant Physiologists, the Canadian Phytopathological Society and the plant specialists from the Canadian Society of Genetics plus those Canadian botanists currently lacking society affiliations. Students have been omitted except as they occur in the membership lists of the above societies. Various members of the Plant Research Institute staff have contributed to the compilation and we, as an Institute, must accept responsibility for any weaknesses.

We hope to keep this list up to date. Additions and corrections will, therefore, be welcomed and should be forwarded to the Plant Research Institute.

R. A. Ludwig,
Director, Plant Research Institute.
